Experiment 3: Jaccard Similarity (Tanimoto Coefficient)

```
import re

# Accept two sentences
sentence1 = input("Enter first sentence: ")
sentence2 = input("Enter second sentence: ")

# Convert to lowercase and tokenize into unique words
tokens1 = set(re.findall(r"\b\w+\b", sentence1.lower()))
tokens2 = set(re.findall(r"\b\w+\b", sentence2.lower()))
```
